(54) ELECTROLUMINESCENT ELEMENT

(57)Abstract:

PURPOSE: To obtain an electroluminescent element which has a long-lasting luminescent capability and an excellent durability.

CONSTITUTION: A compd. of the formula (wherein R1 and R2 are each an optionally substd. alkyl, alkoxy, or phenyl group provided they may be the same or different from each other) is incorporated into at least one org. compd. layer of an electroluminescent element which comprises an anode, a cathode, and at least one org. compd. layer including the above-mentioned layer and sandwiched between the two electrodes.
